

# BALANCE

## UV GEL SYSTEM

### COLOR GELS

*Nails by Rise' Carter  
Design by Joanna Klepka, Poland*

#### NOTE:

After thoroughly prepping the nail, always begin each design by applying any **Balance Builder Gel** in polish-like strokes from the cuticle to the free edge using the **Touch Tip Brush** of your choice. Cure for 90 seconds. For the best results, use an **Ultra Pro Full Hand Lamp**.

**Step 1:** Apply **Balance UV Color Gel** in **Wisteria #83** in polish-like strokes from cuticle to free edge. Cure for two minutes. For deeper color intensity, apply a second layer of **Wisteria #83**. Do not cure.

**Step 2:** Using a brush with a fine point, apply semicircles on the nail, leaving a small margin between each color. You'll want to wipe your brush on a clean **Nail Wipe** between each color. The colors used for this design are **Kelly #91**, **Vamp #86**, **Caution #87**, **Starry, Starry Night #93**, **X-Treme White #1**, and **Sangria #82**.

**Step 3:** Using just the point of your brush, lightly pull the gel from center to outer edge several times around the nail, wiping your brush on a clean **Nail Wipe** after each line. You'll want to work quickly, and if you are doing more than one finger on a hand, lock the design for 10 seconds before moving to the next finger. Cure for 2 minutes in an **Ultra Pro Full Hand Lamp**. Remove the tacky dispersion layer with **Cleanse**.

**Step 4:** For a high-gloss shine, apply **Finish Clear** and cure for 90 seconds. Remove the tacky dispersion layer with **Cleanse**.
