

Perma Gloss

Perma Gloss Instructions

For Professional Use Only

Perma Gloss is a UV activated gel sealant that creates a superior high gloss shine designed for any enhancement service. It saves time, eliminates buffing, and helps to prevent lifting by sealing all edges of the enhancement. The non-yellowing formula is impervious to pigments, stains, dyes, solvents, and household chemicals. **Perma Gloss** is a great value added service for increased income.

Instructions for All Enhancements

1. Finish enhancements with NSI Zebra, Black Cushion, or Endurance 180 grit file.
2. Remove dust filings with Plush Brush.
3. Wipe with Nail Wipe moistened with Cleanse.
4. Apply Perma Gloss Prep moderately, brushing from cuticle to extension edge. Be sure to cap sidewalls and edges. Allow to dry for 1 minute.
5. Apply Perma Gloss liberally to entire enhancement surface, brushing from cuticle to extension edge. Be sure to cap sidewalls and edges.
6. Cure under UV Gel lamp for 2 minutes.
7. Remove the tacky layer with a Nail Wipe saturated with Cleanse.
8. Apply a drop of Nurture Oil to the cuticle area and massage. Have your client wash their hands with soap and water.
9. Wear with or without nail polish.
10. If applying nail polish, use Thermoshield or Airshield to completely dry the polish.
